SSW 690B Weekly Status Update (one submission per team)

Team: *Hobby Matcher*

Week Ending: 4-16-2019

Project Status: (Green, yellow, red)
One word assessment of how is the team doing relative to the schedule?
Yellow

Team Status Summary: *Where are we now?*
One or two sentences describing high-level project status and progress.

Some bugs emerged at the backend, which results in the problem in server, maybe due to the Redis module involved, or the database, but still need some time to fix it,

Last week's activities by team member:
Zhe:

I work on requirements and prototype user interface
this week with the help of my teammate, I used postman to test some back-end APIs.

Haoxuan:
- *What did I work on?*
  fix the bugs in the Redis
  What did I accomplish?
  most of the bugs

Did I learn anything new this week (due to this project)?
the sync between MySQL and Redis
Xueshi:
- *What did I work on?*
  Function of update events
  Update API using postman
- *What did I accomplish?*
  Function of update events
  Update API using postman

- *Did I learn anything new this week (due to this project)?*
  Postman Collection API

Chris:
- *What problems did you encounter and what impact might those have on meeting the project schedule?*
- I am working on adding photos to hobbies. I am also looking to get all the hobbies from the API as well as being able to create events to hobbies.
- We need to perform more testing. Sometimes we run into backend bugs which block the frontend development work

Action Items/Goals for next week:
Team Goals for next week:
Where do we want the project to be next week?

we will continue to develop the posting a blog function and comment on a blog function, and add the feature adding a photo when creating a hobby.

Individual Goals
Zhe:

I will keep using postman to do the testing, keep up the path with back-end's development.

Haoxuan:
- *What do you plan to work on and accomplish in the next week?*
  Chose the sync method between RDB and AOF
Xueshi:
- *What do you plan to work on and accomplish in the next week?*
  Modify existing queries to fit for Redis server.
Chris:
- *What do you plan to work on and accomplish in the next week?*
- I am going to work on the events pages
