SSW 690B Weekly Status Update (one submission per team)
Due Monday by 11:59pm each week we meet in class

Team: _Hobby Matcher_

Week Ending: 4-9-2019

Project Status: (Green, yellow, red)
One word assessment of how is the team doing relative to the schedule?
Yellow

Team Status Summary: _Where are we now?_
One or two sentences describing high-level project status and progress.

Since almost all the API had been documented, the next development step will be very fast, and our back-end people had already accomplished the function related to the event, like join an event, find the event, and is able to add the photo to the event.

Last week's activities by team member:
Zhe:

I work on requirements and prototype user interface
Last week I learned the polymorphism, and this week I learned Constructor and Garbage Collection

Haoxuan:
- _What did I work on?_
  Add redis cache to improve system performance
  Blog API
  Authority authentications about the system 403 401 400 return code
- _What did I accomplish?_
  Optimize Authority interceptor.
  Blog API
  API doc for the whole backend created by postman.
Did I learn anything new this week (due to this project)?
  the data structure and commands in Redis such as operate list, sortlist, set and sortset

Xueshi:
- _What did I work on?_
  Join events function
  Find events function
  Fix a bug about upload images to events. Now we can upload the image to the server.

- _What did I accomplish?_

Join events function
Find events function
Create join_events table
Fix a bug about upload images to events. Now we can upload the image to the server.

- *Did I learn anything new this week (due to this project)?*
  Spring parameters.
  Difference about Request Part and Request Param.
  Learn how to test with Postman more deeply (Param, multi-form, raw)..

Chris:
- *What problems did you encounter and what impact might those have on meeting the project schedule?*
- I am working on adding photos to hobbies. I am also looking to get all the hobbies from the API as well as being able to create events to hobbies.
- We have been working together to create a postman collection to document our API which has been super helpful. We need to do more end to end testing in the application

Action Items/Goals for next week:
Team Goals for next week:
Where do we want the project to be next week?

we will continue to develop the posting a blog function and comment on a blog function, and add the feature adding a photo when creating a hobby.

Individual Goals
Zhe:

I will keep learning java, try to do the testing, next week I am going to finish the section about error handling.

Haoxuan:
- *What do you plan to work on and accomplish in the next week?*
  add the redis server to the project
Xueshi:
- *What do you plan to work on and accomplish in the next week?*
  Function to update events.
Chris:
- *What do you plan to work on and accomplish in the next week?*
- Next week I will work on adding the profile screen and squashing some bugs that come up in testing
Other Comments:
Any other relevant information to help us to manage the project and keep our customer informed and happy.
